

## Jingoian for President “Resetting” Government

January 17, 2008

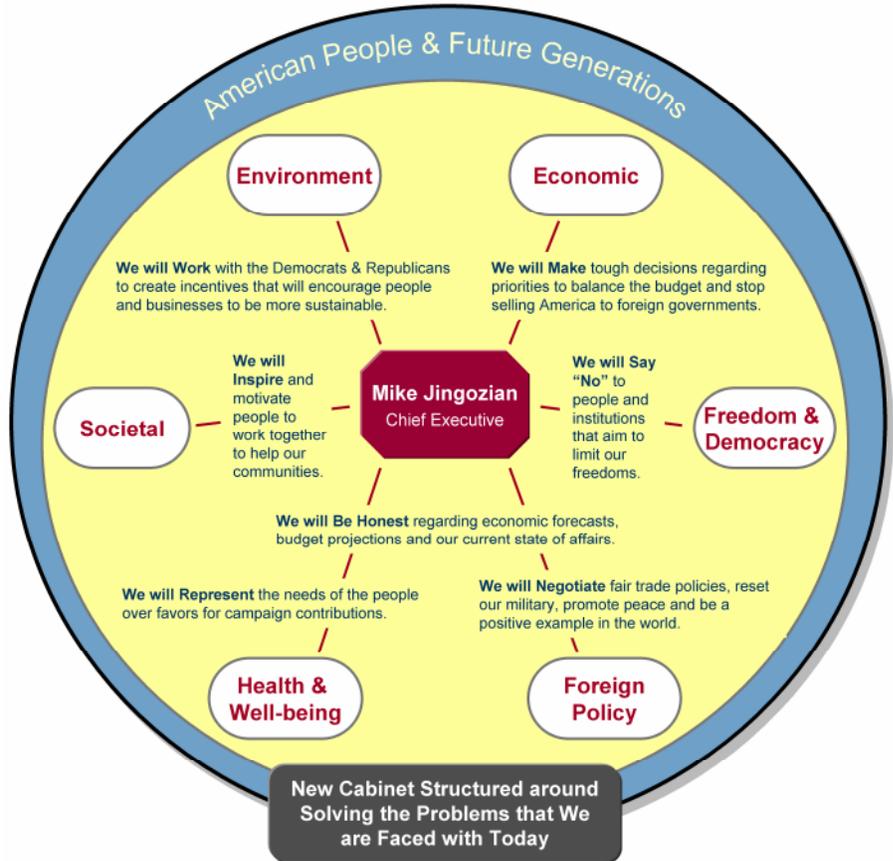

\_Resetting Government (RESET America).doc

### Reorganizing Government around Today’s Challenges

The problems facing our nation and our children are serious. These problems are a result of policies created by the Democrats and Republicans. Therefore, it is irresponsible of us to hinge our future on the assumption that these same people really want change. After all, it’s the “status quo” because those in power want it to be the “status quo.” The 2-party system is destroying our nation, our freedoms and our liberties. It must be replaced immediately.

### Being Present & Resetting Government

There is a new philosophy emerging about how we interact with our universe. It is based on principles from people like Eckert Tolle, or classes taught by Landmark Education or explained in the popular movies, “What the Bleep do we Know” and “The Secret”. As a Presidential candidate, I’m often asked about my religious beliefs. I suppose it’s a combination of all these kinds of philosophies. I like to say that I’m spiritual, but not religious. As far as including “under God” in the Pledge of Allegiance, I do not believe that it should be included. Although I consider myself to be a deeply concerned and spiritual individual, the government should not promote one religion or philosophy over another.

### Changes MUST Come from Outside the System

Any changes to the system must come from outside the system. Therefore, regardless of whom the candidates are or how long they have been in office, they will be **ineffective** in bringing about change.

If you want to build a new house, but there’s an old shack in the way, no amount of remodeling will work (trust me here, folks. I learned the hard way). You need to tear down that old barn to build something extraordinary.

We cannot expect to bring solve these problems with the same people who created them! As Ben Franklin said... “Change can only come from 1 direction... outside.”

We see this in business all the time – don’t we? **Transformational change** never occurs by the players WITHIN an industry. It **always** comes from outside.

## No Incentive to Change

What is the main objective of any politician today? Get Reelected. And, in today's corrupt system, this means generating as much cash as possible.

There seems to be two cycles in Washington. One, collect the cash, and two, return the favor. Both parties profit by the status quo and there is **no incentive** for them to change it. Just look at how they function. **Both** the Democrats and Republicans:

- ★ Are afraid to tackle tough issues because the solutions are not politically popular.
- ★ Often only address "distraction issues."
- ★ Would rather see a program fail than to see their opponents win.
- ★ "Flip-flop" on issues for political gain while ignoring facts and data.
- ★ Fail to consider the long-term ramifications of their policies.
- ★ Won't support a valid idea from the other party unless it benefits them.
- ★ Lie outright about the status of situations.
- ★ Manipulate data and budget projections.
- ★ Lie and manipulate the media.
- ★ Use their positions for personal gain.
- ★ Are too afraid to admit they were wrong, so they "stay the course."
- ★ Are too afraid to change their mind about issues.
- ★ Live in a separate class that is out-of-touch with the American People.

*...and yet we continue to vote for these people!*

## RESET America is a Real Plan

RESET America is a Real Plan to take back government and start addressing our challenges. The Democrats and Republicans have a plan too, but it's not one that's in the best interests of you or this nation.

Let's face it, our future isn't pretty. The problems facing our future are getting worse and growing in number. Our only chance to save our nation and planet is to "reset" our government. RESET America offers a specific road-map to allow us to start implementing real and viable solutions.

The alternative to this plan is "what we have now." This is not a responsible course-of-action. As parents, friends, and American citizens, we need to consider what the best alternative is for our children and nation. This is our one chance to address these issues before valid solutions disappear forever.

## Resetting our Administration and Cabinet

This message transcends politics. It transcends Conservatives, Liberals, Democrats, and Republicans. It's about surviving as a nation and as a planet. It's about getting all disenchanting people together to pursue a common goal. This is why we must convince all Americans to only vote for Independent and 3<sup>rd</sup> party candidates: Individuals who are willing to put honesty and integrity above their own personal interests.

In the same vein, it is ludicrous for us to adopt the same organization and Cabinet structure as those of previous Presidential administrations.

The Cabinet positions of the past no longer apply. They are part of the system that caused the situation we have today. Therefore, we will structure a new Cabinet around the areas most affecting our future. We intend to structure our Cabinet around the six areas of sustainability. This new Cabinet will include functional areas that correlate to the six areas. The chart above depicts our cabinet structure and policy objectives.

These Cabinet positions will be filled by our most respected scientists, doctors, diplomats, scholars, and economists to determine our optimal course of action based on accurate data and honest projections.

These Cabinet positions will not be filled in exchange for favors or campaign contributions. Unbelievably, key government posts are held by individuals who lack basic understanding of their assigned fields. And, in many cases, they benefit financially from their title and office at the expense of the people whose interests they swore to protect.

We often think of sustainability just in terms of the environment. Obviously, environmental sustainability is a big concern for our future. However, that does not prevent other areas of concern from ending our way of life, in other words:

- ★ We will not survive as a **Nation** without **Economic Sustainability**.
- ★ We will not survive as a **Civilization** without **Social Sustainability**.
- ★ We will not survive as a **Species** without **Personal Health and Well-being Sustainability**.
- ★ We will not survive as a **Democracy** without the **Protection of Essential Liberties and Freedoms**.
- ★ We will not survive as a **World Leader** without **Non-aggressive Foreign Policy and Diplomacy**.
- ★ And of course, we will not survive as a **Planet** without **Environmental Sustainability**.

## Time is Running Out

But time is running out. We have only 1 election left before many of these solutions are no longer possible. Our problems are getting worse and given the fragile state of our nation, the solutions that are viable today won't be possible in 2012. **We cannot expect to bring solve these problems with the same people who created them!**

- ★ We need to hold **ourselves accountable** and **stop blaming** the politicians.
- ★ We need to be **leaders** for the rest of the world to follow.

But for those in power now, to change the way things are done would be to relinquish the power and privilege they've enjoyed for decades – and that (my friends) will never happen unless we take control.

Please, talk about us in:

- ★ Blogs
- ★ Radio Talk Shows
- ★ Letters to the Editor of any Publication
- ★ Magazine and Newspaper Editorials
- ★ Tell your Friends in the Media about RESET America

There is nothing more important to us as individuals or as a nation than protecting Freedoms and Liberties.

Never before has a collapsing empire has the ability to determine it's own fate.

- *Michael Jingoian*
